LP
Date: 4/14/03 Time: 8:25 am
Personal: Where:
Telephone: 530 Number: 621-5266

Individual(s)/Agency Contacted: Janice Gordon, USFS

Conversation Description: Ms. Gordon's office is processing the acquisition of property located within the S½ of the SW¼ section 17, T13N, R12E, MDB&M. Her inquiry was for clarification of Statement of Water Use and Diversion (Statement) #4943 and what other water right information did we have documenting water use within section 17.

I informed Ms. Gordon that Statement #4943 was originally filed in 1970 for a diversion from a spring near the center of section 17. However, it is noted that the claimant also called the source as Dad Young's Spring. The claimant in their supplemental reports for the periods from 1991 to 1993 informed us of a correction being the spring was located within the NW¼ of NW¼ section 21, T13N, R12E, MDB&M. On the Tunnel Hill USGS Quadrangle, it shows a spring named Dad Young's Spring. I advised her that the use was made under riparian claim and the use over the years has changed from dust control to stockwatering to forest enhancement. I advised that if the place of use is in the S½ of the SW¼ section 17, Dad Young's Spring water is not a riparian supply to the property, so an application to appropriate water is needed.

Told Ms. Gordon that our records have no documentation of any active diversion of water in section 17. Since the Quadrangle shows a stream channel traversing the parcel east to west, then portions of the parcel may have riparian entitlement to the natural flow of said unnamed stream. New Statement or application for a permit needs to be filed with us if a diversion occurs or is proposed.

Decision(s): Action Items:

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.
